

About Speedware

Speedware is a leading provider of legacy modernization and migration solutions, business intelligence tools and application development solutions. Over the last 30 years, we have become a global company that has diversified our portfolio of solutions to align with the trends of the IT industry. Our focus has been on developing enterprise solutions that deliver productivity enhancement to companies of all sizes.

Legacy Modernization Solutions

Speedware provides cost-effective legacy modernization solutions that help companies stay agile by aligning their IT environments with business objectives, adopting leading-edge systems and reducing the total cost of ownership.

Recognizing the significant investment of time and money required to customize original applications, our solutions focus on retaining the embedded business logic of legacy systems while enabling them to work with modern systems that are flexible and open. Speedware's modernization solutions leverage proven methodologies and best practices, so that customers benefit from solutions with the lowest cost and least risk.

- **Automated Tools:** In addition to our complete portfolio of modernization services, Speedware develops and supports innovative migrations tools, such as AMXW and DBmotion. By automating the migration process, these tools eliminate the need for manual coding, resulting in less time and effort to migrate applications and lowering the risk of human error. Additionally, automated tools produce predictable and repeatable results while causing the least disruption.
- **"Lift and Shift" Migrations:** Speedware has unmatched expertise in performing lift and shift migrations of business applications to modern, open platforms. Our comprehensive and innovative portfolio of migration solutions and tools enable customers to replace specific components of their infrastructure, such as hardware, databases, languages or utilities, without altering the functionality of the applications. Lift and shift migrations

are low-risk solutions that modernize components of the environment, lower infrastructure costs and require little to no retraining of end users. Speedware specializes in lift and shift migration of a wide variety of third- and -fourth-generation language applications, databases and third-party utilities.

Speedware Professional Services

Speedware clients benefit from our highly trained team of implementation experts. We offer a full range of IT services designed to meet diverse business strategies, as well as comprehensive, fully-integrated solutions that incorporate a wide array of technology. From providing planning and training services for a do-it-yourself customer project, to fully outsourced project management, Speedware consultants provide services that cater to a customer's specific IT needs.

Our team can provide as little or as much assistance as required to complete the project, whether it be helping to get the project underway in its initial stages, or assuming complete ownership of the project.

- **Detailed Modernization Analysis (DMA):** Speedware's unparalleled DMA provides a precise outline of the time, resources and financial investments required to complete a successful modernization project. Based on a complete on-site assessment of your company's current environment and modernization needs, our professional services team will recommend the technologies, process and methodology that best meet your business needs – at the best price and the lowest risk.

About Speedware

Business Intelligence

Speedware's Business Intelligence solutions target the needs of business managers seeking to access, analyze and understand company information. Speedware provides decision support solutions and analytical applications that empower managers to leverage their data and improve business processes and customer interactions.

- **Media** is an advanced OLAP tool that turns raw data into highly targeted information. It gives you the power to identify problems or opportunities, predict trends, measure organizational performance and analyze customer interactions. Available in both web and desktop versions, Media allows you to respond quickly to events, so that your whole organization benefits.
- **Esperant** is a sophisticated query and reporting solution that allows organizations to rapidly query complex data and generate custom reports for improved business performance.

Application Development Technology

Our Applications Development Technology experts design powerful tools for the creation and deployment of business-critical applications for the mid-range and desktop markets. Since the 1980s, Speedware tools have fully evolved to meet the needs and demands of the ever-changing IT markets.

Certified Customer Support

Speedware's complete line of software and services is backed by an outstanding customer support center, providing customers with valuable help during world-wide business hours. In fact, Speedware is the first Canadian-owned software company to receive Support Center Practices (SCP) certification.

Our support offerings include traditional product support via telephone, email or the web, migration and on-site support, and application support and maintenance. Supported customers also receive access to Speedware's award-winning documentation. Speedware prides itself on its dedication to its customers and is committed to providing them with extensive support and services to help them get the most value out of their Speedware investment.

About Speedware

Speedware has been dedicated to helping companies modernize their business applications for over 15 years and enjoys a 100% project success rate. The company specializes in developing end-to-end modernization solutions that allow industry and government leaders to increase their business agility and reduce their operational costs. Speedware has been a leading provider of enterprise software solutions since 1976, offering a complete suite of legacy modernization, migration and application portfolio management solutions, business intelligence tools and application development solutions.
